

Marina Korsak

Playable Ads Developer · HTML5 / JavaScript Interactive Ad Creative

Gdańsk, Poland · marinakorsak7@gmail.com · +48 571 934 533 · [linkedin.com/in/marina-korsak](https://www.linkedin.com/in/marina-korsak)

SUMMARY

Playable ads developer with 5 years building high-performing HTML5 and JavaScript interactive ad creatives (playable ads) for international clients across major ad networks. Focus on lightweight, fast-loading playables that drive engagement and conversion. AI-native workflow using Claude Code, GitHub Copilot, and Codex for faster development, testing, and iteration. Also experienced in front-end development — landing pages and responsive HTML, CSS, and JavaScript.

SKILLS

Playable Ads: HTML5, JavaScript, Canvas, CSS, responsive design, interactive ad creative

AI-Assisted Development: Claude Code, GitHub Copilot, Codex — coding, testing, iteration pipeline

Front-End: HTML5, CSS, JavaScript, responsive web design, landing pages, cross-browser

Design & Assets: Blender, Photoshop, in-playable animation

Tools: Git, GitLab, SFTP deployment

EXPERIENCE

Playable Ads Developer — Studio Cation Inc.

Aug 2021 – Present · Remote

- Build HTML5 and JavaScript playable ads for international clients, delivered across major ad networks.
- Focus on lightweight, fast-loading interactive creatives optimized for engagement and conversion.
- Integrated AI-assisted development (Claude Code, GitHub Copilot) into the build pipeline for faster coding, testing, and creative iteration.
- Create in-playable visual assets and animations using Blender and Photoshop, working at the intersection of development and design.

HTML / Front-End Developer — Freelance

Dec 2020 – Dec 2022

- Developed responsive landing pages and web pages using HTML5, CSS, and JavaScript.
- Delivered client projects through a GitLab-based workflow with SFTP deployment.
- Built cross-browser, mobile-responsive layouts to client specifications.

EDUCATION

European Humanities University (EHU) — Informatics / Computer Science, Bachelor's program (in collaboration with EPAM Systems)

2022 – 2025 · incomplete (3 years of coursework completed)

Secondary vocational education — Pharmacy
